D350-602 pod again

Importance: High

David/Mike:

For the D350-602-011 clamp change (DSI 9512/9515) I discovered from Russ that the bolts used to fasten the clamps to the xtubes should be AN4-13A (DSI says -14A). I will have to update DSI 9512/9515 accordingly.

I had used the -14A's based on the released ICA-D350-607 (basically the same clamping). According to Dan/Russ the new basket should use -13A's as well and that ENG had been informed of this.

Linda: the pick kit for the D350-602-011 pod that was just packaged may have to be altered. I think we can still ship it tomorrow, but the DSI may have to be faxed separately.

-Chris
